Meters

Prodigy Autocode®

The Only English - Spanish speaking, No-Coding, blood glucose monitoring system available.

- Alternate Site Testing- Offers you the option of testing other places such as your palms, forearms, upper-arms, thighs and calves. These places tend to have fewer nerve endings than your fingertips thus resulting in more comfort and less pain.
- Small Blood Sample- Requires only a tiny blood sample
- One-Button Simplicity- Uses one button for easy navigation
- Teamwork- Another great advantage of the Prodigy AutoCode® is that it promotes team work. You are able to hear your child's or spouse's test result from across the room and work together as a team to manage their diabetes
- No-Coding- Simply insert your test strip and begin to test. This feature avoids the danger of false results caused by coding errors
- Audible- Speaks your test results in English or Spanish in just 7 seconds
- Full USB port- Requires any standard USB cable
- Memory and Data Management- Stores up to 120 test results with time and date and gives 7, 14 and 28-day averages

Aviva by Accu-Check®

Avoid painful retesting, and waste fewer strips with the ACCU-CHEK® Aviva meter system. The easy, quick-fill test strip fills with a small sample, helping 97% of testers fill correctly on their very first try with very little pain. The 198 system integrity checks help detect and prevent unreliable results. The ACCU-CHEK Multiclix lancing device uses unique technology that minimizes painful side-to-side motion and also uses a load-and-go drum of 6 preloaded lancets along with a full-featured blood glucose meter. Comfortable design with nonslip rubber grips and choice of 6 test sites on the body. Have more confidence in your results with Aviva.

- Quick, 5-second results
- Small 0.6 microliter sample size
- Contoured, ergonomic design with easy-to-hold rubber grips
- 4 customizable test reminders
- Downloadable 500-value memory with 7-, 14- and 30-day averaging
- Uses 1 readily available 3-volt lithium coin cell battery
- 2,000-test battery life
- 3.7" H x 2.1" W x 0.9" D; 2.1 oz. with battery
- The ACCU-CHEK Aviva blood glucose meter is compatible with ACCU-CHEK data management tools

Meters

SureEdge® by Speciality Medical Systems

Specialty Medical Supplies is proud to introduce the SureEdge® Blood Glucose Meter into our family of products. Now with a “No Code” feature, this meter requires only 0.7 μ l whole blood sample and gives results in seven seconds! Another prominent feature of the meter is a strip-ejection function so that the user does not have to handle the strip after testing. Other unique features of the SureEdge® meter include four alarm settings, internal established codes for the strips that simplify set-up, 450 test storage capacity and ability to perform alternate site testing. The SureEdge® meter has a Ketone Warning function that appears if the reading is equal to higher than 240 mg/dL which allows the user to better control their daily blood glucose results and reduces the risk of ketoacidosis.

- Methodology: Amperometric Glucose Biosensor
- Blood Volume/Sample Size: 0.7 μ l
- Test Time: 7 Seconds
- Strip Ejection Function: Yes, helps prevent cross-contamination
- Alternative Site Testing: Yes, Fingertips, Palm, Forearm, Upper-Arm, Thigh & Lower Leg.
- Hematocrit Range: 20% - 60%
- Test Range: 20-600 mg/dL / 1.1-33.3 mg/dL
- Test Memory: 450 Tests
- Date and Time: Yes
- Automatic Alarm Functions: Yes, Custom - 4 Alarm Setting
- Ketone Warning: Yes, if Test Result is > 240 mg/dL
- Results Indicator: Yes
- Average Calculator: Yes, maintains 7,14,21,28, 60 & 90 day averages
- Download capacity: Yes. Smart Data Management available.
- Auto Shut Off: Yes, 3 minutes
- Warranty: Meters - Three years from date of purchase.

TRUEtrack® by Home Diagnostics, Inc.

TRUEtrack® delivers clinically accurate results you can rely on and it is fast and easy. Enjoy advanced performance features that make testing easier, faster, and more accurate, all at an affordable cost.

- Simple 2-step testing just insert strip and test
- Fast, accurate results in 10 seconds
- Small, 1-microliter blood sample

Insulin Pumps

Sprint by Accu-Check

The makers of ACCU-CHEK products offer a complete line of insulin pump supplies and accessories. You may know us best as one of the leading manufacturers of blood glucose meters. The same precision and expertise that goes into our meters goes into every component of the ACCU-CHEK Spirit insulin pump system.

- Small and lightweight like a pager
- Delivers 480 basal doses of insulin each day
- The largest insulin cartridge of any pump - 315 units - which means fewer changes
- Includes a backup pump* to help ensure uninterrupted pump therapy should the unexpected occur

Aviva by Accu-Check®

OneTouch® Ping is the intelligent glucose management system with one purpose: working together to help you perform at your best. Like other insulin pump systems, OneTouch Ping frees you from multiple daily injections and gives you the ability to quickly and easily adjust your insulin based on your body's immediate needs. But unlike other systems, the pump is packed with unique capabilities that may be accessed both wirelessly (by using the meter-remote) and manually. The meter-remote is designed to make your life with diabetes easier and more discreet. Along with many other functions, the remote also allows gives you the control to dose your insulin. OneTouch Ping also provides dedicated Animas support.

Insulin Pumps

MiniMed by Medtronic

This small, portable device fits easily into your lifestyle, delivering fast-acting insulin 24 hours a day helping you to eliminate injections for food.

Amigo® by Nipro Diabetes Systems

The Amigo closely mimics the pancreas by consistently delivering basal insulin throughout the day and night and allows you to program bolus insulin whenever needed. It is a smart pump with advanced features designed to ensure safety, reliability, accuracy and durability. The Amigo is truly a friend that opens the door to a new-found freedom to choose what to eat, where to go, and what to do. With the Amigo you have the freedom to live like everyone else despite your diabetes.

- A reliable stepper motor to help ensure safety
- Computer-like help screens for easy programming of pump sequences
- On-screen help messages with details on how to respond to pump alerts and alarms
- A highly accurate bolus estimator that does all the calculations
- Three bolus modes: normal, extended, and layered
- Multiple basal profiles to allow for a variety of activities
- Temporary basal profile in units per hour or as a percentage of current basal profile
- User-set reminders of when to test blood sugar, change the syringe, or if you're attempting to give more insulin than you have allotted
- Screens represented by both icons and words for easy recognition
- Status menu to view current operating conditions and insulin on board
